WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/JP2005/000912

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
 This opinion has been established on the basis of a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material
 a sequence listing
 table(s) related to the sequence listing
 - b. format of material
 in written format
 in computer readable form
 - c. time of filing/furnishing
 contained in the international application as filed.
 filed together with the international application in computer readable form.
 furnished subsequently to this Authority for the purposes of search.
3. In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4. Additional comments:

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/JP2005/000912

Box No. IV Lack of unity of invention

1. In response to the invitation (Form PCT/ISA/206) to pay additional fees the applicant has:
 - paid additional fees
 - paid additional fees under protest
 - not paid additional fees
2. This Authority found that the requirement of unity of invention is not complied with and chose not to invite the applicant to pay additional fees.
3. This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is
 - complied with
 - not complied with for the following reasons:

Main invention: claims 1-8 and 10-12
Invention 2: claim 9

Claim 1, examined as the invention described first (main invention), is disclosed in the prior art document (JP 2002-063091 A (Nippon Telegraph And Telephone Corp.), 28 February 2002, specification paragraphs 0027 and 0030).
Claim 1 includes a notebook PC connected to the Internet, which is conventional and sufficiently well known to not need document citations.
The above results indicate that claim 1 is not a special technical feature in the sense of the second sentence of PCT Rule 13.2
Based on the above, the requirement of unity of invention was evaluated.
The special technical feature of the main invention relates to generation of a packet for causing a partner image to execute an action by operating the screen.
The special technical feature of invention 2 relates to causing a partner terminal to execute imaging and return the acquired image.
4. Consequently, this opinion has been established in respect of the following parts of the international application:
 - all parts
 - the parts relating to claims Nos. 1-8, 10-12
